

Project Plan

The Code sQuAd

1)Members: Alyssa Prah, David Watkins, Irene Penuelas, Harold Bermudez

2)Deliverables: Most - Least

- ★ Complete step 1 (developing the web page content without JavaScript) by Thursday, November 17th
- ★ Complete step 2 (generating the left side images) by Wednesday, November 23nd
- ★ Complete step 3 (handling the right side) by Wednesday, November 30th
- ★ Complete step 4 (finishing the game) by Monday, December 5th
- ★ Make sure everything works properly. If not, go back and repeat the steps again until the page behaves properly.

3)Define what you are tasked creating

- ★ We are tasked with making a matching game. We will have dog pictures and the user will have to press the face that is not matched We will have one side of the webpage under 1 id and the other with a different id.

4)Estimated times are in number 2.

Pitfalls that are most likely to occur:

- ★ Off Task.
- ★ Bugs in the code.
- ★ How to code the different number of pictures on each side.
- ★ Different id's when all code is combined.
- ★ Case-insensitive vs case-sensitive.
- ★ Different ideas not colliding.
- ★ Distracting others while they are trying to work.
- ★ Difficulties in team communication.
- ★ Miscommunication on the instructions.
